PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate with strong knowledge of Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, and Web Development. Experienced in developing full-stack web applications and backend systems. Worked as a Backend Developer in Smart India Hackathon (SIH) and contributed to scalable application development. Passionate about software engineering, problem-solving, open-source development, and emerging technologies.

EDUCATION

Siwan College of Engineering and Management

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Bihar Engineering University

Affiliated University

Siwan, Bihar

2023 – 2027

Patna, Bihar

Current CGPA: 7.39/10

EXPERIENCE

Backend Developer

Smart India Hackathon (SIH) - Team Pixel Titans

2024

Project Development

- Designed and developed backend modules for the Smart India Hackathon project.
- Created RESTful APIs and integrated database operations for efficient data handling.
- Collaborated with frontend developers to ensure smooth client-server communication.
- Participated in debugging, testing, deployment, and performance optimization activities.
- Contributed to project architecture and implementation during the SIH development cycle.

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python, JavaScript

Web Technologies: HTML, CSS, JavaScript, React.js, Node.js, Express.js

Databases: MySQL, MongoDB

Core Subjects: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOPs

Tools & Platforms: Git, GitHub, VS Code, Linux

PROJECTS

College Website Development

- Developed a responsive and modern college website for providing academic and administrative information.
- Implemented dynamic pages for departments, notices, events, faculty details, and student resources.
- Designed user-friendly interfaces ensuring accessibility across desktop and mobile devices.
- Improved navigation and content management for students and faculty members.

Campus Share Platform

- Built a campus-focused resource-sharing platform for students.
- Implemented secure authentication and user management functionalities.
- Designed database architecture for efficient storage and retrieval of shared resources.
- Enhanced collaboration among students through digital sharing and communication features.

Smart India Hackathon Project

- Worked as Backend Developer for the Smart India Hackathon project under Team Pixel Titans.
- Developed APIs, managed database integration, and implemented server-side logic.
- Optimized backend performance and ensured reliable application functionality.
- Collaborated with team members throughout development and project presentation phases.

ACHIEVEMENTS

- Shortlisted participant in Smart India Hackathon (SIH) as a member of Team Pixel Titans.
- Worked as Backend Developer and contributed significantly to project development and implementation.
- Developed real-world applications including a College Website and Campus Share Platform.
- Active contributor to software development projects through GitHub.

CERTIFICATIONS

- NPTEL Online Certification Courses
- Technical Training and Skill Development Programs

LEADERSHIP & ACTIVITIES

- Collaborated with multidisciplinary teams during hackathons and software development projects.
- Participated in technical competitions, coding challenges, and innovation events.
- Demonstrated strong teamwork, communication, leadership, and problem-solving abilities.
